

# Master Pollution Liability Insurance for ARA Members

Cost Effective Pollution Liability Insurance Offered and available as a stand alone policy

## ARA Members Pollution Liability Program

\$1,000,000 / \$25,000,000 Each pollution event limit / aggregate policy limit \$10,000 deductible

Environmental liabilities can arise for virtually any business especially for business in the automotive industry. The majority of property and casualty policies do not insure pollution risk, leaving the environmental insurance policy as the sole means to recover loss and expense caused by environmental issues. If your business were held responsible for contaminating the environment (even for a small incidental occurrence), you could face large unexpected expenses.

You enjoy lower premiums resulting from the enhanced buying power HUB possesses as a major broker of environmental liability insurance.
